

THE GLOBAL  
COMPACT

# **1. General Statistics**

**7 March 2006**

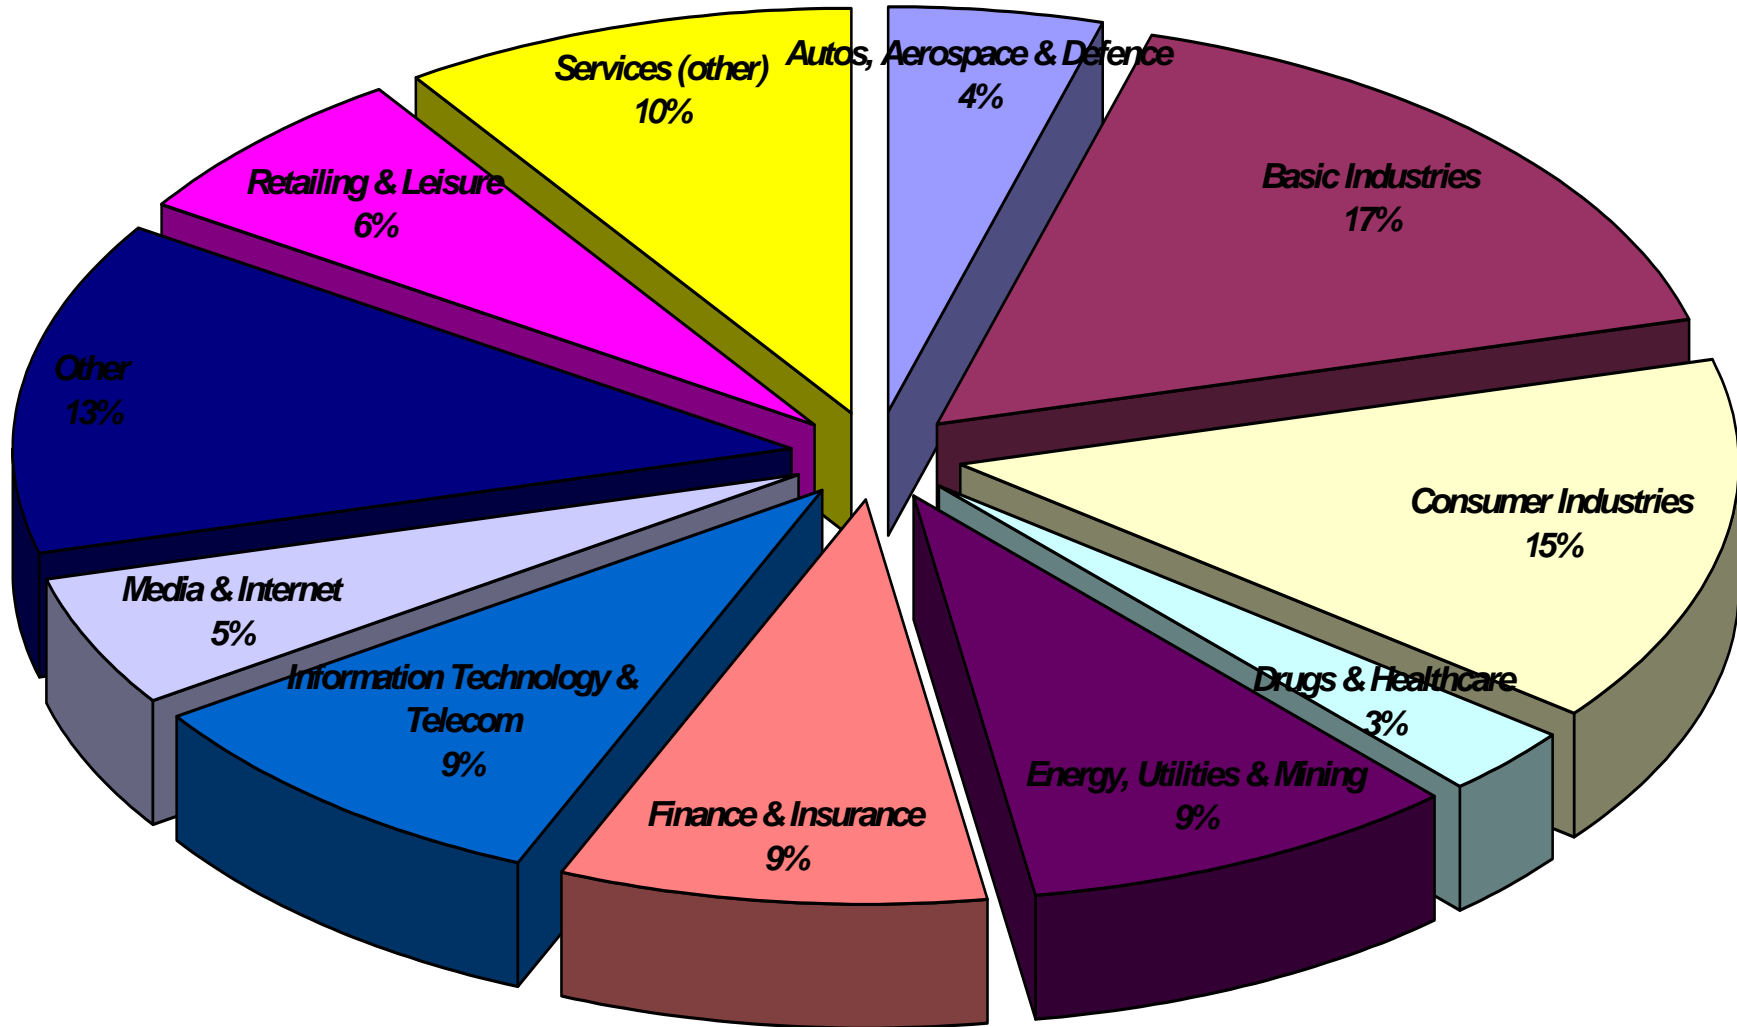

# Global Compact business participants

## 2,471 business participants, by region

## 2,471 business participants, by industry

## 2,471 business participants, by Size

*\* The Global Compact classifies companies as FT Global 500 (World's largest companies by market cap), SMEs (250 employees or less), or large companies (neither SMEs nor Global 500)*

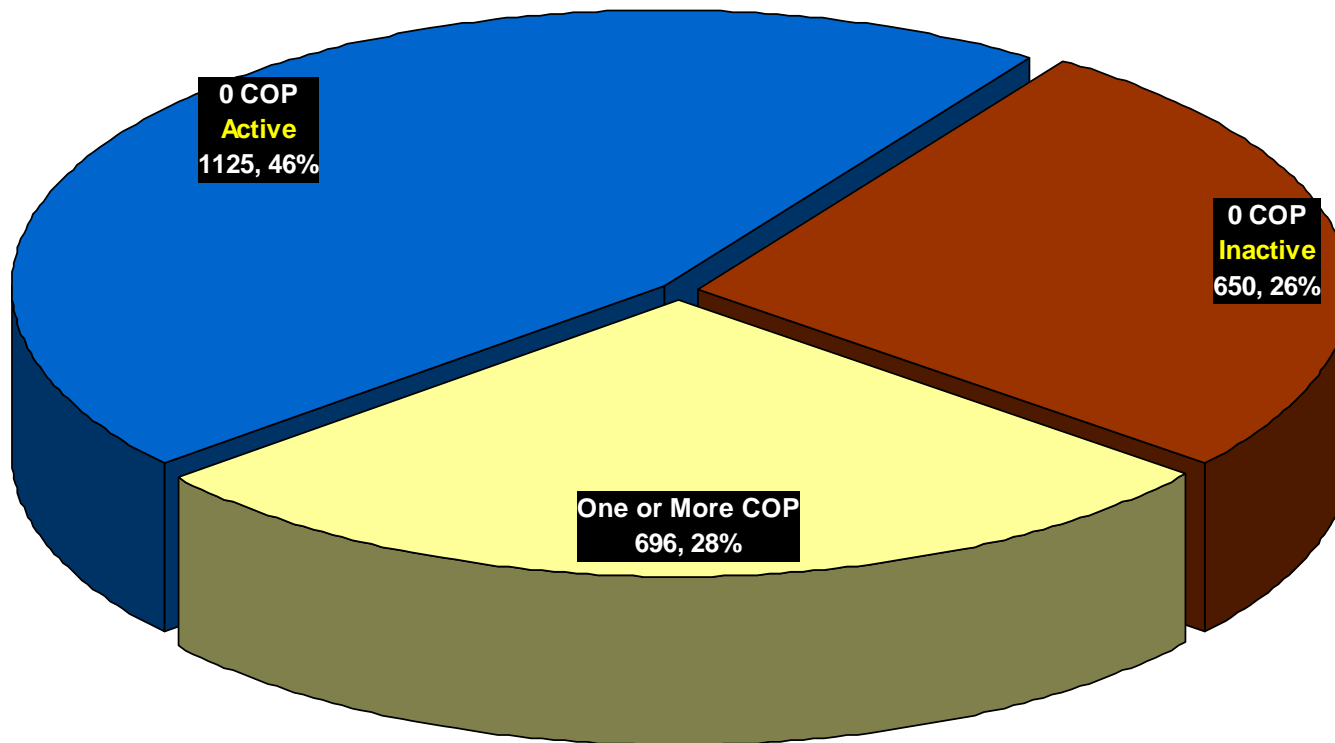

THE GLOBAL  
COMPACT

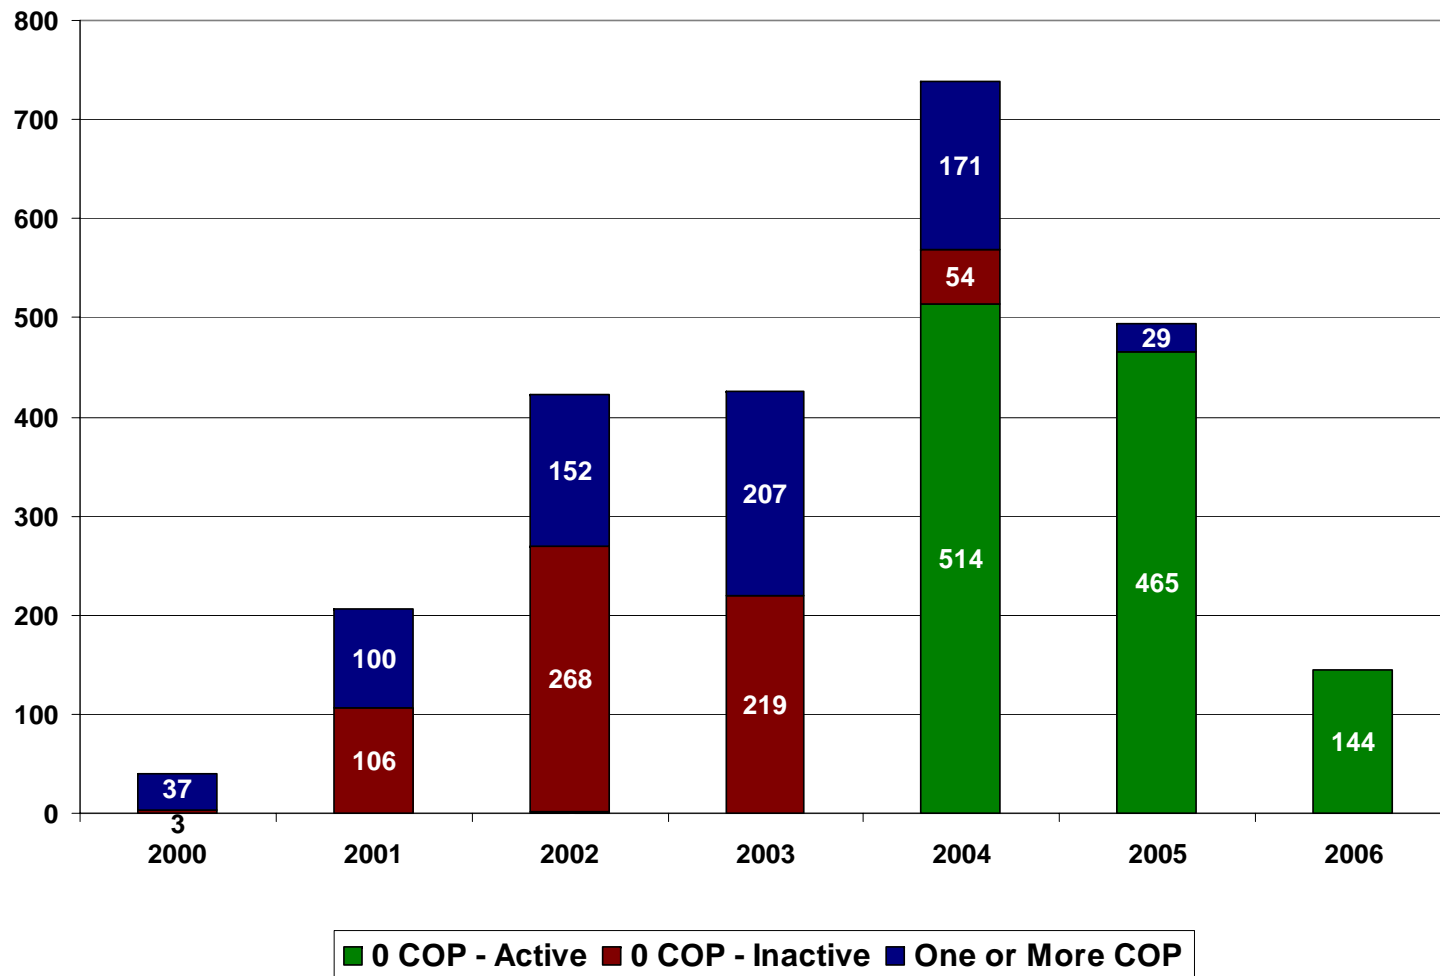

## **2. COP Statistics**

**7 March 2006**

# COP status of business participants – general

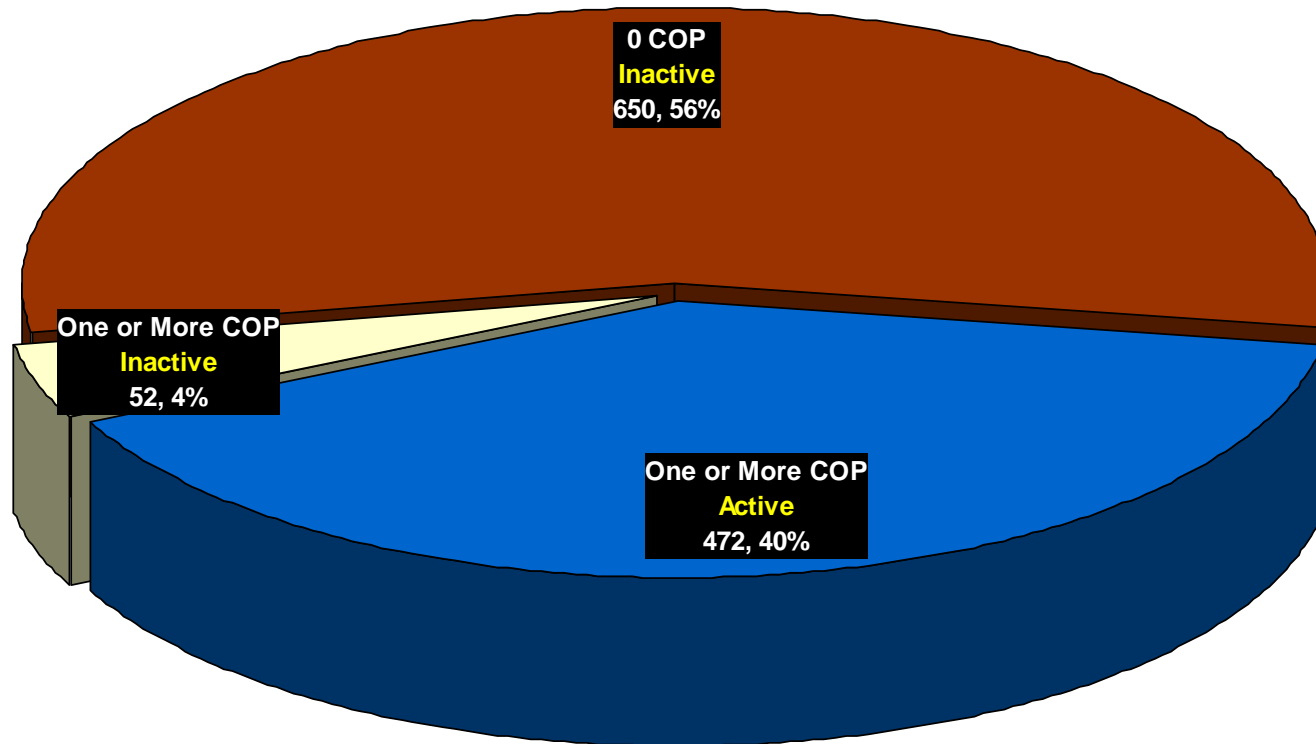

# COP status of business participants, by year of joining

# 1,174 companies joined more that 2 years ago

- 472 communicated progress regularly (40%)
- 52 communicated progress once or twice but failed to renew (4%)
- 650 have never communicated progress (56%)

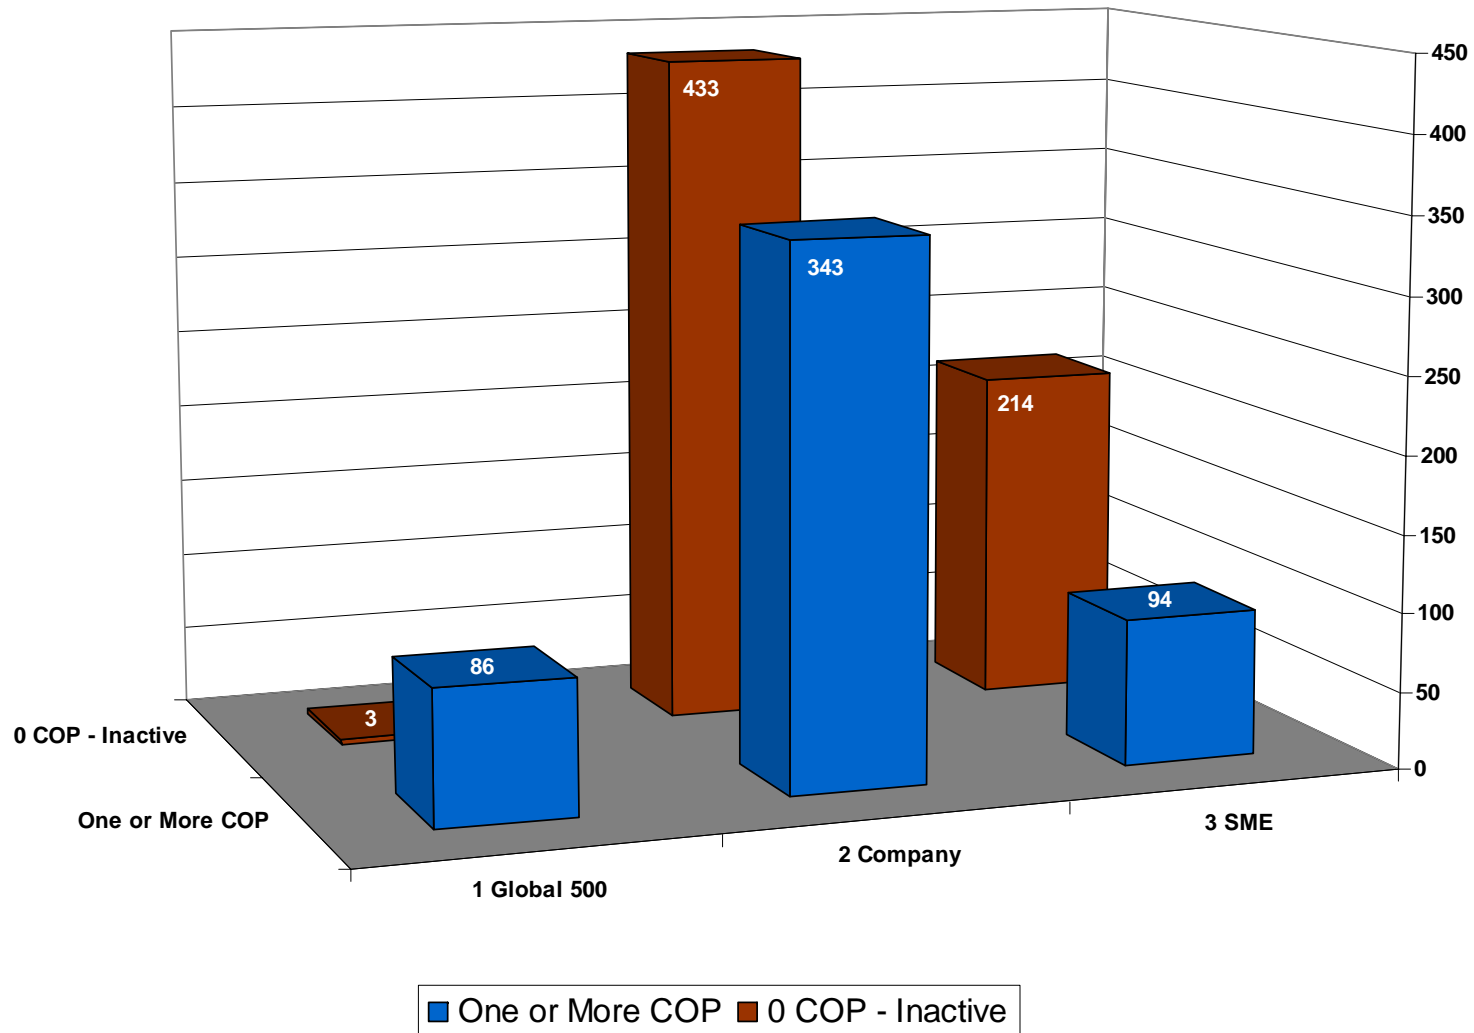

# **650 have never communicated progress**

## **Age of this population:**

- **54 joined in 2004 – 8%**
- **219 joined in 2003 – 33%**
- **268 joined in 2002 – 40%**
- **106 joined in 2001 – 16%**
- **3 joined in 2001 – .5%**

# 1,174 companies joined more that 2 years ago

# The 10 countries with 80% of non-communicating companies

## **A Clear Regional Pattern**

**Looking at the 30 countries with the most inactive participants (95%), we see that:**

- 2/3rd of countries with the most Communications on Progress are in Western Europe**
- 2/3rd of countries with the most inactive participants are in are in Africa (40%) and Asia (27%)**

**COPs are a challenge for all non-multinational companies, not only SMEs**

**In countries with the most Communications on Progress , Large Companies perform much better than SMEs (65% v. 37%)**

**However, in countries with the most inactive participants (where the problem lies), the situation is somewhat similar (29% v. 17%)**

# COPs are a challenge for all non-multinational companies, not only SMEs

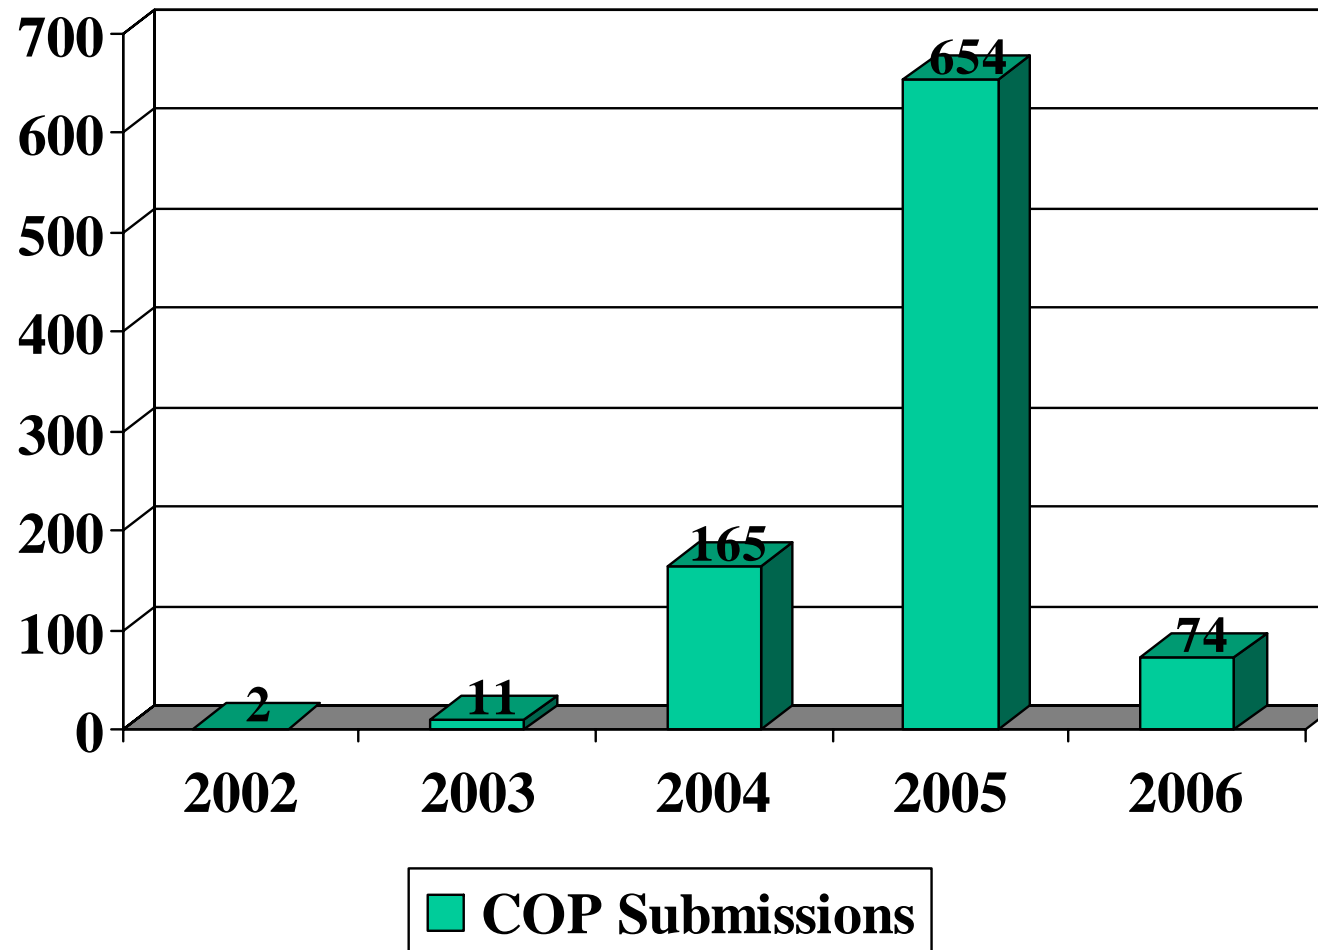

*Proportion of 1,174 companies who have communicated progress, by size*

# It's a learning process!

Percentage of companies who communicated progress, by year of participation
