Dints International Communication on Progress 2015

Dints International remains fully committed to upholding the 10 principles of the UN Global Compact and I hereby present our 2015 Communication on Progress. These principles are at the core of our work. We believe responsible and sustainable business is a powerful development tool.

From a personal perspective, I started the company with these principles as my main goals. My vision is to create a system of business, primarily in Africa and developing markets, that helps communities where we work. I believe by creating a business environment adhering to the Global Compact it will make sense both financially and developmentally for all stakeholders to participate fully.

In 2014-2015 Dints, based on its first-hand experience, focussed also on the particular challenges of SMEs in developing countries. The company has been networking with UNIDO inter alia, and is finalising a system for integrating SMEs into large scale supply chains so local business can quantum leap frog forward and thus reduce poverty. A website for this purpose is being developed for launch in 2016.

This communication reaffirms Dints' support to the Global Compact and describes the activities in the past year aimed at continuing to embed the ten principles in our business. I look forward to the leaps that we expect to make in the coming year and reporting on our progress in 2016.

Geoffrey de Mowbray
CEO
