Secretary-General
United Nations
New York, NY 10017
USA

Dear Mr. Secretary-General,

I am pleased to inform you that SMS – Security & Monitoring Services Co. is fully committed to supporting throughout its whole business, the ten principles of the United Nations Global Compact with respect to human rights, labour, environment and anti-corruption.

With this letter, our company wishes to express our intent to advance those principles within the sphere of our influence. We have progressed our business operations since 2007 responsibly, in a way that supports the same principles and are now committed to officially realising a sustainable business strategy that incorporates these values under the official auspices of the UN Global Compact. Widely acknowledged as the highest quality private security company in Egypt, SMS believes that its initiatives in advancing societal goals will impact on other businesses' corporate sustainability. Alongside integrating the ten principles into all aspects of our business strategy and working culture, we are also ready to take active steps in taking part in collaborative projects with various partners that envision the further advancement of the United Nation's broader development goals.

Our company is also dedicated to fulfilling the key requirement of submitting the annual Communication on Progress (CoP) document in order to participate in the UN Global Compact. We are a business that takes accountability and transparency seriously, and therefore are fully committed to submitting the CoP within one year of joining the Global Compact, as well as providing on-time, further yearly progress reports. This includes:

- A statement expressing continued support for the principles of the Global Compact and the UN's broader goals, signed by the Chief Executive Officer of SMS. We recognise that this is separate from our initial letter of commitment in order to join the Global Compact initiative.
- A list describing practical actions the company has taken in order to advance the principles of the Global Compact in its sphere of influence. This includes any policies, procedures, activities that the company has taken in the past year or intends to take in the future that implements principles within the four main areas of human rights, labour, environment and anti-corruption.
- A statement measuring outcomes of said actions, including the degree to which targets were met or other qualitative or quantitative measurements of results.

Sincerely yours,

General Mohamed El Tarabishi
CEO, SMS – Security & Monitoring Services Co.
